Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 2-5, 7, 10 and 12 have been canceled, Claims 1, 6, 8-9 and 11 are pending.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to a sequence comprising a portion of a chemokine receptor, classified in class 530, subclass 351.
 - II. Claims 6 and 8, drawn to a polypeptide and a composition comprising a sequence of a portion of HIV-1 envelope glycoprotein, class in 424, subclass 208.1.
 - III. Claim 9, drawn to an antibody binding to chemokine receptor, classified in class 424, subclass 131.1.
 - IV. Claim 11, drawn to a method of treating an HIV-1 infection, classified in class 424, subclass 93.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I to III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to different products having different structures and functions, e.g. the product of Group I is a polypeptide comprising a sequence of a chemokine receptor, whereas, the product of Group II is a polypeptide comprising a sequence of HIV envelope protein.

Inventions I and IV related as process of using and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be practiced with materially different product or (2) that the product as claimed can be practiced by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as PCR claimed in group I can be used by another and materially different process influence the leukocyte migration rather than treating HIV infection.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the literature and sequence searches required for one of the Groups are not required for another one of the Groups, restriction for examination purposes as indicated is proper.

Art Unit: 1648

The inventions are distinct, each from the other because of the following reasons:

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
